

**Tinkerbelle Lilac**  
*Syringa 'Tinkerbelle'*

Height: 6 feet

Spread: 5 feet

Sunlight: ○

Hardiness Zone: 3b

Group/Class: Fairytale Series Lilac

**Description:**

A new hybrid introduction related to the Meyer lilac, featuring showy spikes of spicy fragrant true pink flowers in late spring, small rounded foliage and a compact habit of growth; neat and tidy, an excellent garden shrub; full sun and well-drained soil

**Ornamental Features**

Tinkerbelle Lilac is blanketed in stunning panicles of fragrant pink flowers at the ends of the branches in late spring, which emerge from distinctive crimson flower buds. The flowers are excellent for cutting. It has dark green foliage throughout the season. The small pointy leaves do not develop any appreciable fall colour. The fruit is not ornamentally significant.

**Landscape Attributes**

Tinkerbelle Lilac is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Tinkerbelle Lilac is recommended for the following landscape applications;

### **Planting & Growing**

Tinkerbelle Lilac will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
