

Jubilee Nootka Cypress

Chamaecyparis nootkatensis 'Jubilee'

Height: 25 feet

Spread: 8 feet

Sunlight: ○ ●

Hardiness Zone: 5a

Other Names: Alaska Cedar, Nootka Falsecypress, Xanthocyparis

Description:

A towering, graceful, delicately weeping tree with pendulous branches, more so than the species; a great accent tree for the home landscape

Ornamental Features

Jubilee Nootka Cypress has bluish-green foliage. The scale-like leaves remain bluish-green throughout the winter. Neither the flowers nor the fruit are ornamentally significant. The shaggy indian red bark adds an interesting dimension to the landscape.

Landscape Attributes

Jubilee Nootka Cypress is an open evergreen tree with a strong central leader and a distinctive and refined pyramidal form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Jubilee Nootka Cypress is recommended for the following landscape applications;

- Accent
- Vertical Accent
- General Garden Use

Planting & Growing

Jubilee Nootka Cypress will grow to be about 25 feet tall at maturity, with a spread of 8 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 70 years or more.

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species.
