

### **Morning Star Rose of Sharon**

*Hibiscus syriacus 'Morning Star'*

Height: 12 feet

Spread: 8 feet

Sunlight: ○ ●

Hardiness Zone: 6b

Other Names: Shrub Althea

#### **Description:**

A tall, stiffly upright shrub with extremely showy flowers through late summer and early fall; flowers are beautiful, bright white with a dark red center; a very adaptable plant, but prefers full sun, this variety is slightly hardier than the species

#### **Ornamental Features**

Morning Star Rose of Sharon features bold white trumpet-shaped flowers with dark red throats along the branches from mid summer to early fall. It has forest green foliage throughout the season. The lobed leaves do not develop any appreciable fall colour. The fruit is not ornamentally significant.

#### **Landscape Attributes**

Morning Star Rose of Sharon is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects
- Disease

Morning Star Rose of Sharon is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

### **Planting & Growing**

Morning Star Rose of Sharon will grow to be about 12 feet tall at maturity, with a spread of 8 feet. It tends to be a little leggy, with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Morning Star Rose of Sharon makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Its large size and upright habit of growth lend it for use as a solitary accent, or in a composition surrounded by smaller plants around the base and those that spill over the edges. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our store for more information on how to protect it over the winter months.
